bgo LifeScience technologies

Novartis Innovation Campus
Fabrikstrasse 2, Building 3
CH-4056 Basel

Mid-Level QA Automation Engineer

We are looking for **Mid-Level QA Automation Engineer** with 3+ years of experience for one of our projects. We will appreciate self-diligence, ability to give constructive feedback and follow procedures.

The Company

OVER 10 YEARS OF EXPERIENCE IN DIGITAL HEALTH

At BGO LifeScience Technologies we make health digital by empowering our customers to deliver their digital health products and solutions through our premium services.

Our history

Started as a boutique IT company in 2008, in less than 3 years we grew to become a leading IT company with 100+ employees, serving clients from around the globe across several verticals. After more than 12 years of experience within the healthcare industry, we set our main direction. Today, BGO LifeScience Technologies is the digital health lab that aims to improve and save lives today through technology.

Our expertise & services

We have extensive background in the development of clinical research systems, eHealth solutions (web and mobile health applications) and GMP validated systems for pharmaceutical & biotech companies.

Our people

Our culture is defined by our people. We are an innovation team that values mutual trust, creativity, systems thinking, agility, and adaptability. We are creating a movement in the IT industry so that more people choose the professional path towards saving and improving lives through technology.

What We Are Building

We're rebuilding new platform on a cloud-native stack: .NET 10 Minimal APIs behind Clean Architecture boundaries, an Angular 22 front end, SQL Server 2025, and Azure. The target architecture is already written down, your job is to turn the blueprint into production code, slice by slice, and keep it that way under delivery pressure.

WE WILL TRUST YOU WITH

- Create maintain and execute manual and automated test cases based on requirements and user stories.
- Create and maintain automated tests using WebdriverIO or Protractor.
- Preform functional, regression and integration scenarios and identify the right cases for automation.
- Participate in test planning, refinement, sprint planning and other Agile/Scrum ceremonies.
- Contribute to improving test coverage and QA practices.
- Work closely with developers and the wider Agile team to identify and resolve issues.

PROVEN SKILLS IN

- 3+ years of experience in QA / software testing, with solid hands-on automation experience.
- Hands-on experience with WebdriverIO or Protractor.
- Strong practical knowledge of JavaScript.
- Good debugging and analytical skills, with the ability to investigate issues independently.
- Experience with web application testing and common testing types such as functional, regression and integration testing.
- Experience working in an Agile/Scrum environment.
- Fluency in English.
